

Etched Glass

Construction Options and Modifications

These glass designs offer etched linear patterns or an overall fine, sanded texture into which a pattern or shape is etched. Patterns range from mullions to simple shapes. Visibility of cabinetry interiors is possible when some areas of the glass are left unetched.

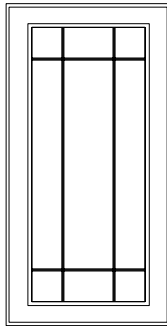

Etched glass is available in most door styles, in sizes from 12" wide and up to 54" high

Glass inserts are ordered individually. Place quantity before order code. See examples for individual items

Material dimensions may be nominal based on lumber industry standards.

Specifications subject to change without notice.
